Community Health Data Report

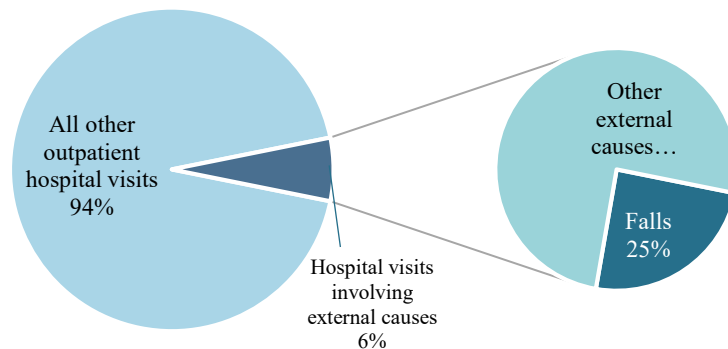

2025.13

Hospital visits involving falls in Westchester County, 2019 - 2023

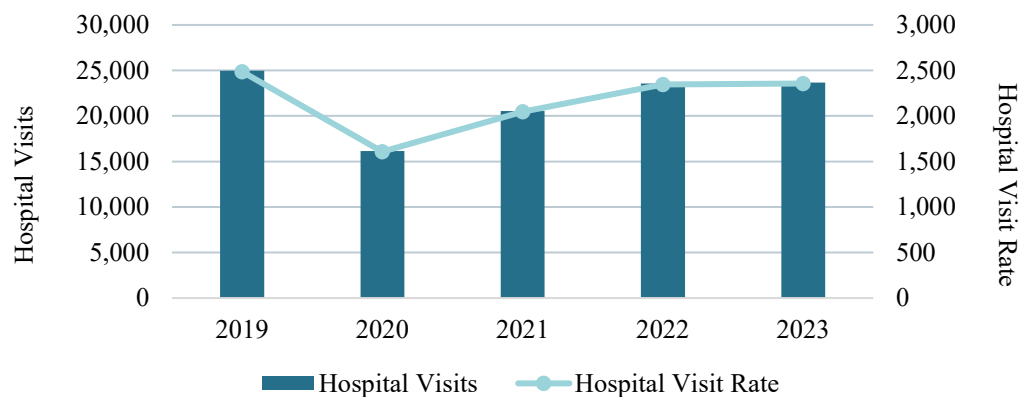

In this issue:

- Overview
- Patient Demographics
- Type of Falls
- Type of Falls by Age Group and Sex
- Principal Diagnoses
- Admission and Discharge Status
- Hospital of Care
- Claim Cost
- Data Sources
- Appendix

Over seven million outpatient hospital visits were made by residents of Westchester County from 2019 to 2023. Of these, six percent involved external causes of morbidity, or injuries and other health conditions that occurred due to external factors. Among these, one-fourth involved a fall. This data report examines outpatient hospital visits involving falls that were made by Westchester County residents during this five-year time span.

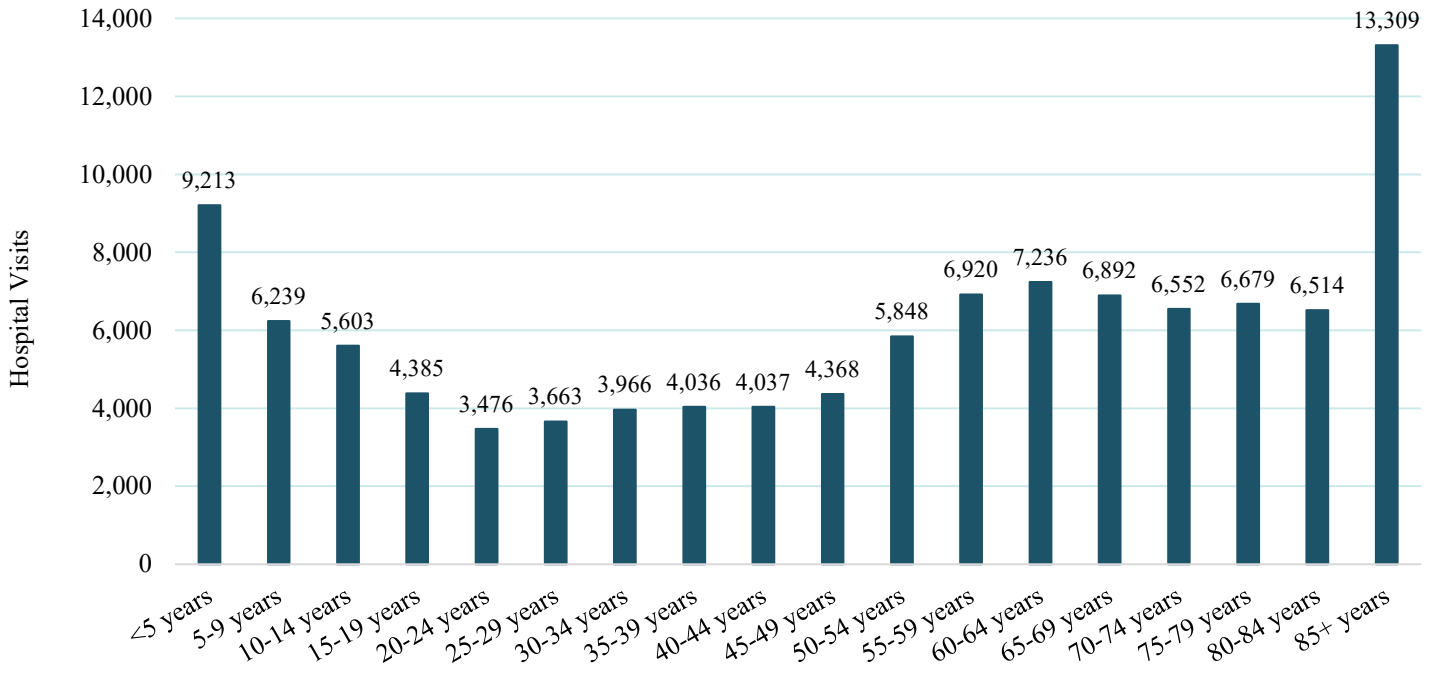

Hospital visits involving falls and rate per 100,000 population, Westchester County, 2019 - 2023

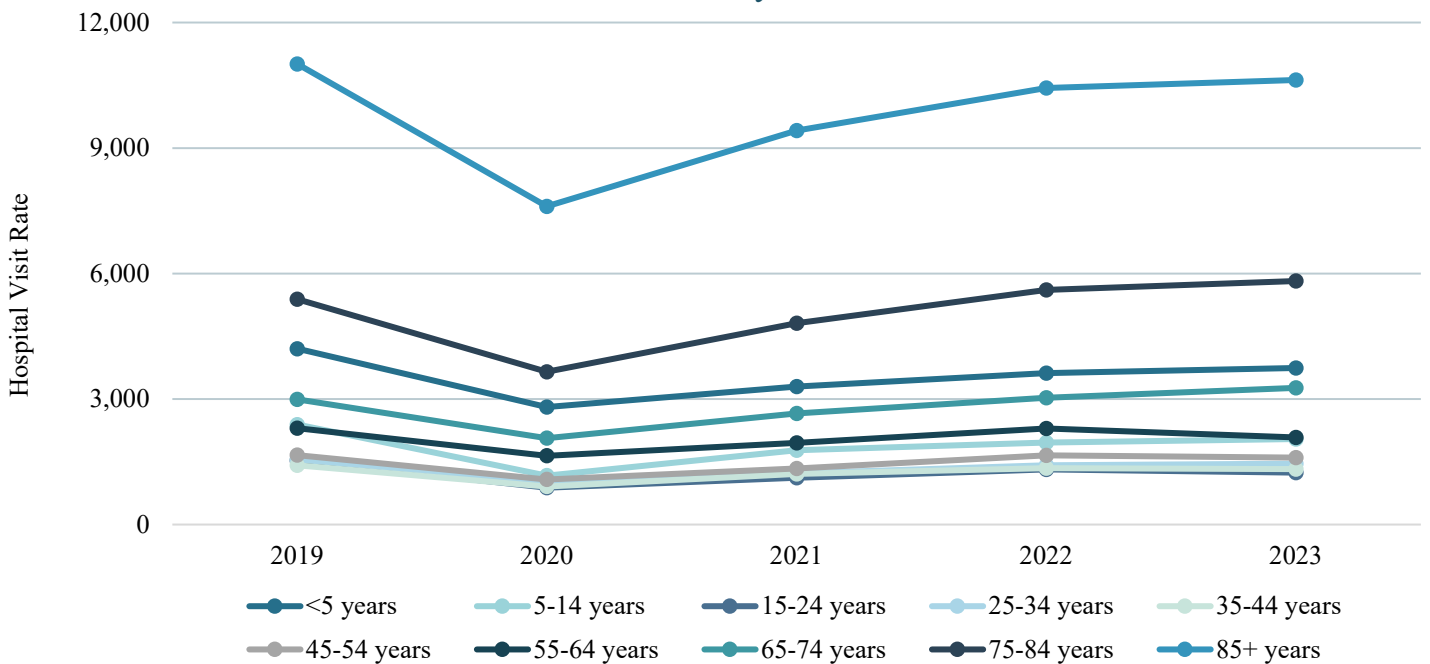

Patient Demographics

Hospital visits involving falls by age group, Westchester County, 2019 - 2023

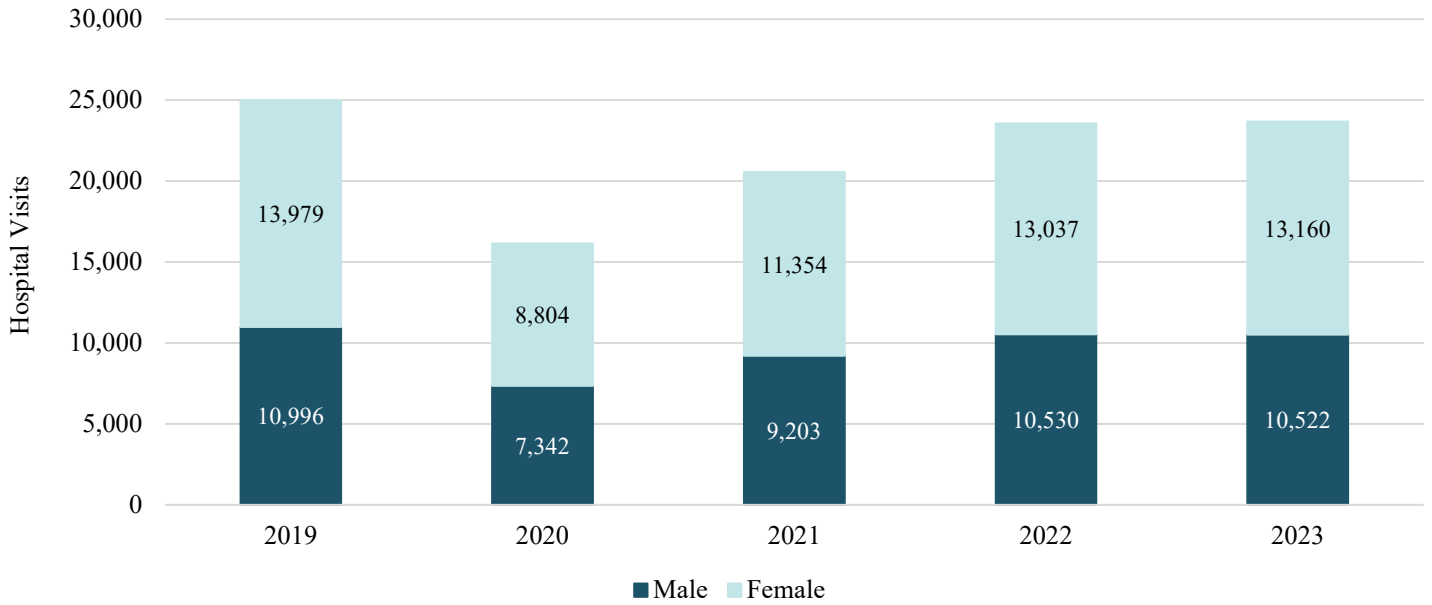

Hospital visit rate involving falls per 100,000 population by age group, Westchester County, 2019 - 2023

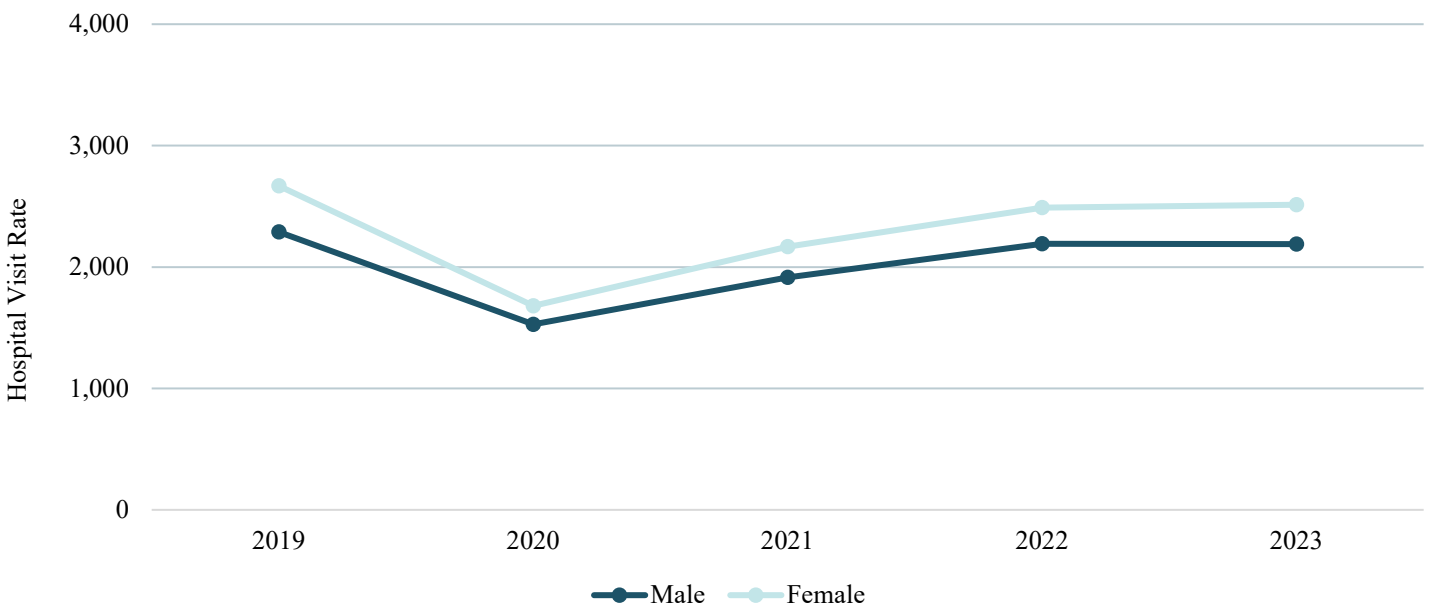

Over 20% of all hospital visits involving a fall were made by adults 85 years and older and children under 5 years. When accounting for population, adults 85 years and older observed the highest hospital visit rates, followed by the 75-84 year age group, while children under 5 years observed the third highest rates.

Patient Demographics

Hospital visits involving falls by sex,
Westchester County, 2019 - 2023

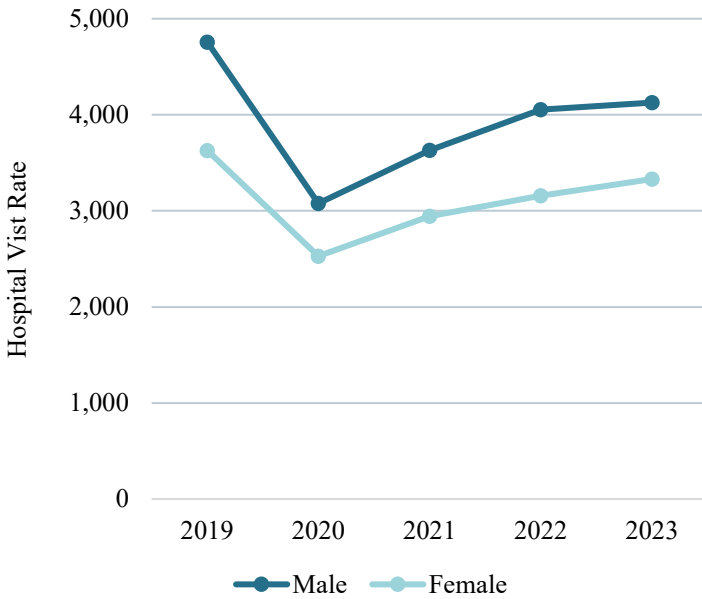

Hospital visit rate involving falls per 100,000 population by sex,
Westchester County, 2019 - 2023

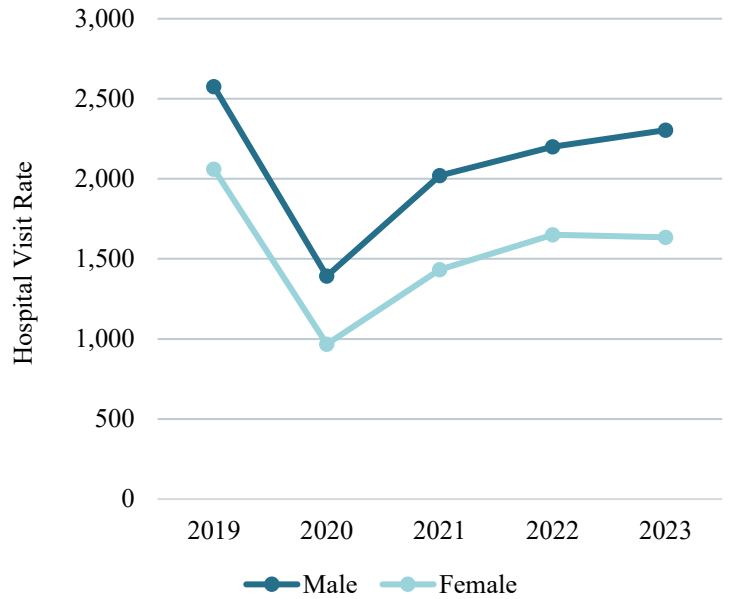

Female patients observed higher hospital visit rates than their male counterparts, accounting for 55% of the total hospital visits that involved a fall.

Patient Demographics

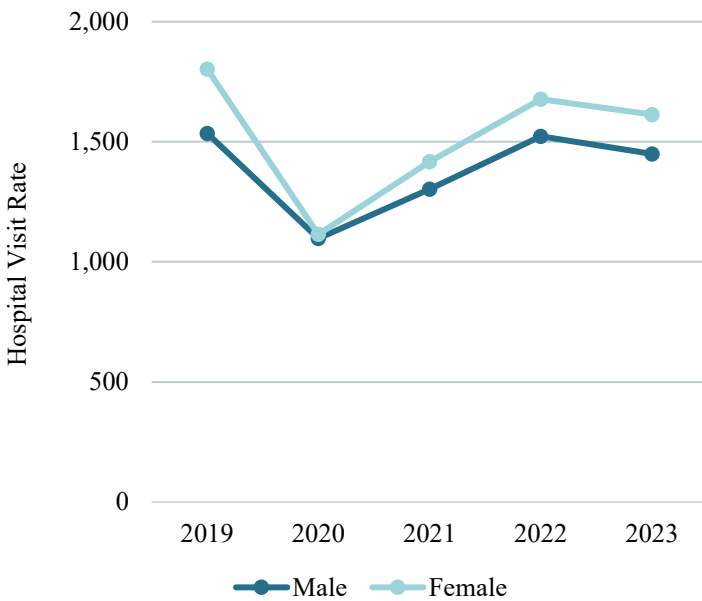

Hospital visit rate involving falls per 100,000 pop. among children under 5 years, Westchester County, 2019 - 2023

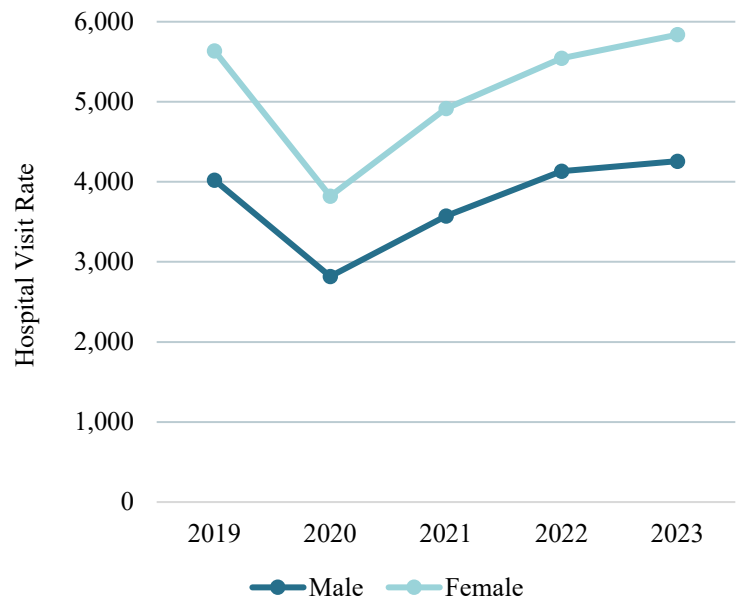

Hospital visit rate involving falls per 100,000 pop. among children ages 5 to 17 years, Westchester County, 2019 - 2023

Hospital visit rate involving falls per 100,000 pop. among adults ages 18 to 64 years, Westchester County, 2019 - 2023

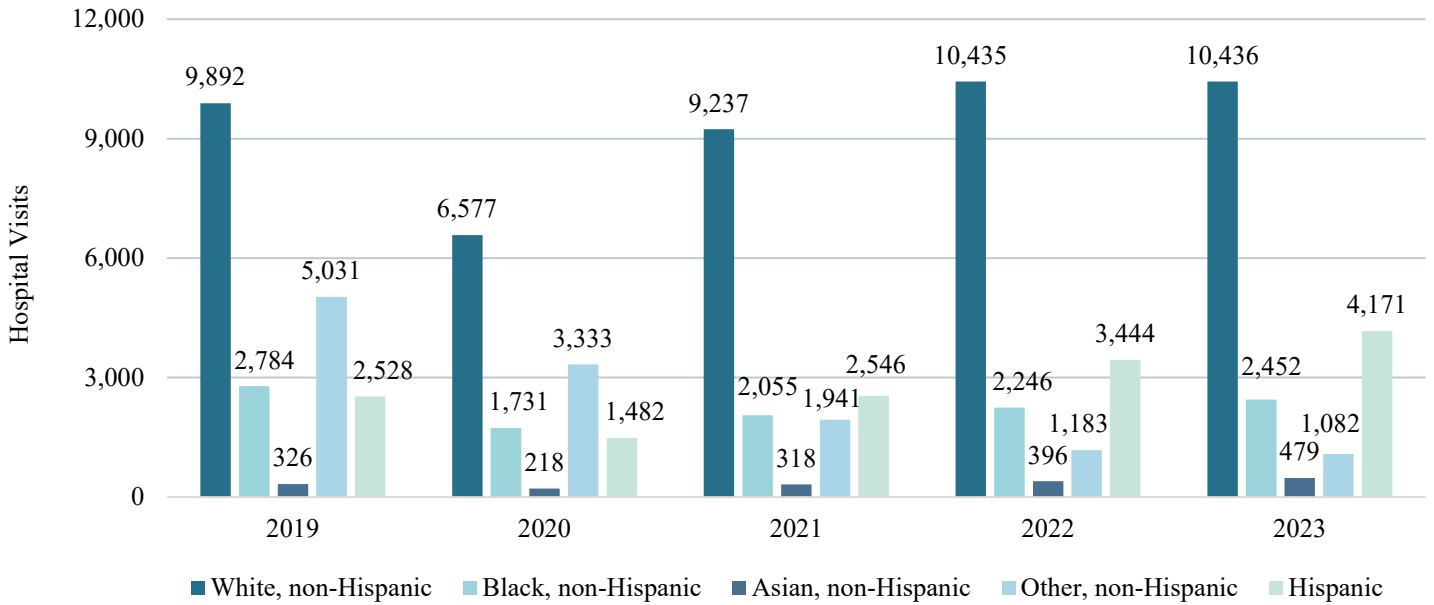

Hospital visit rate involving falls per 100,000 pop. among adults ages 65 years and up, Westchester County, 2019 - 2023

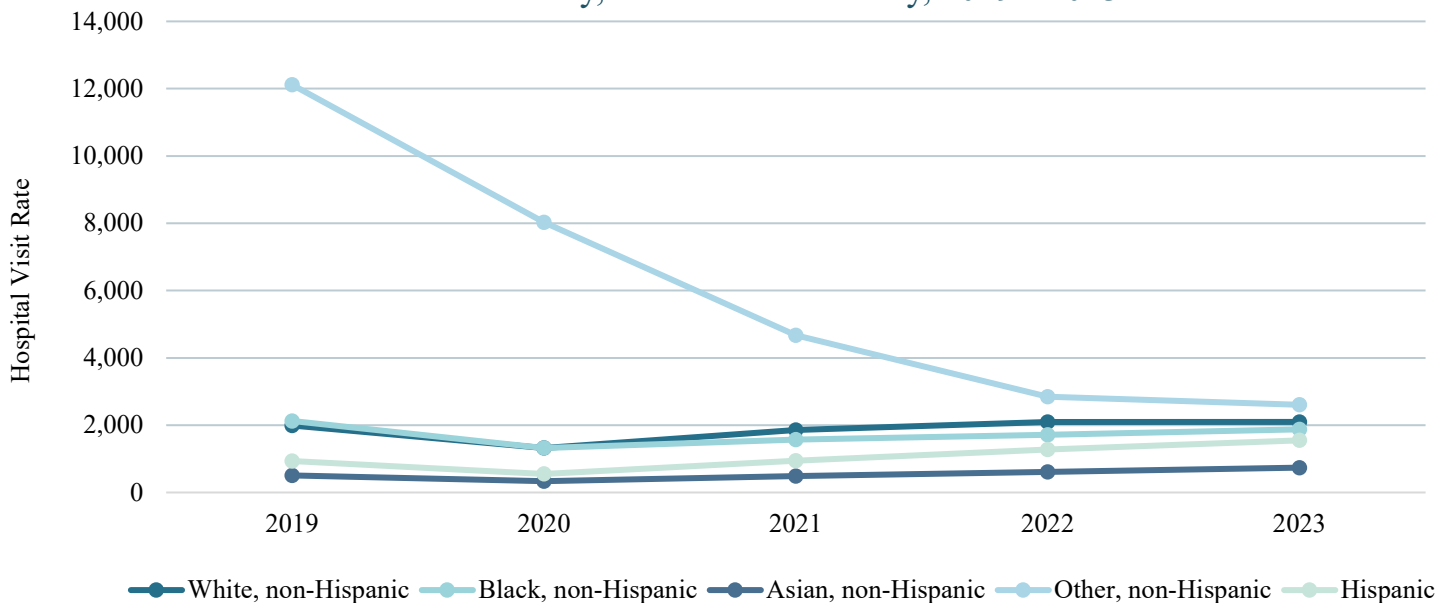

Male children ages 17 years and under observed higher hospital visit rates than female children, while female adults ages 18 years and older observed higher hospital visit rates than male adults.

Patient Demographics

Hospital visits involving falls by race and ethnicity,¹
Westchester County, 2019 - 2023

Hospital visit rate involving falls per 100,000 population by
race and ethnicity,¹ Westchester County, 2019 - 2023

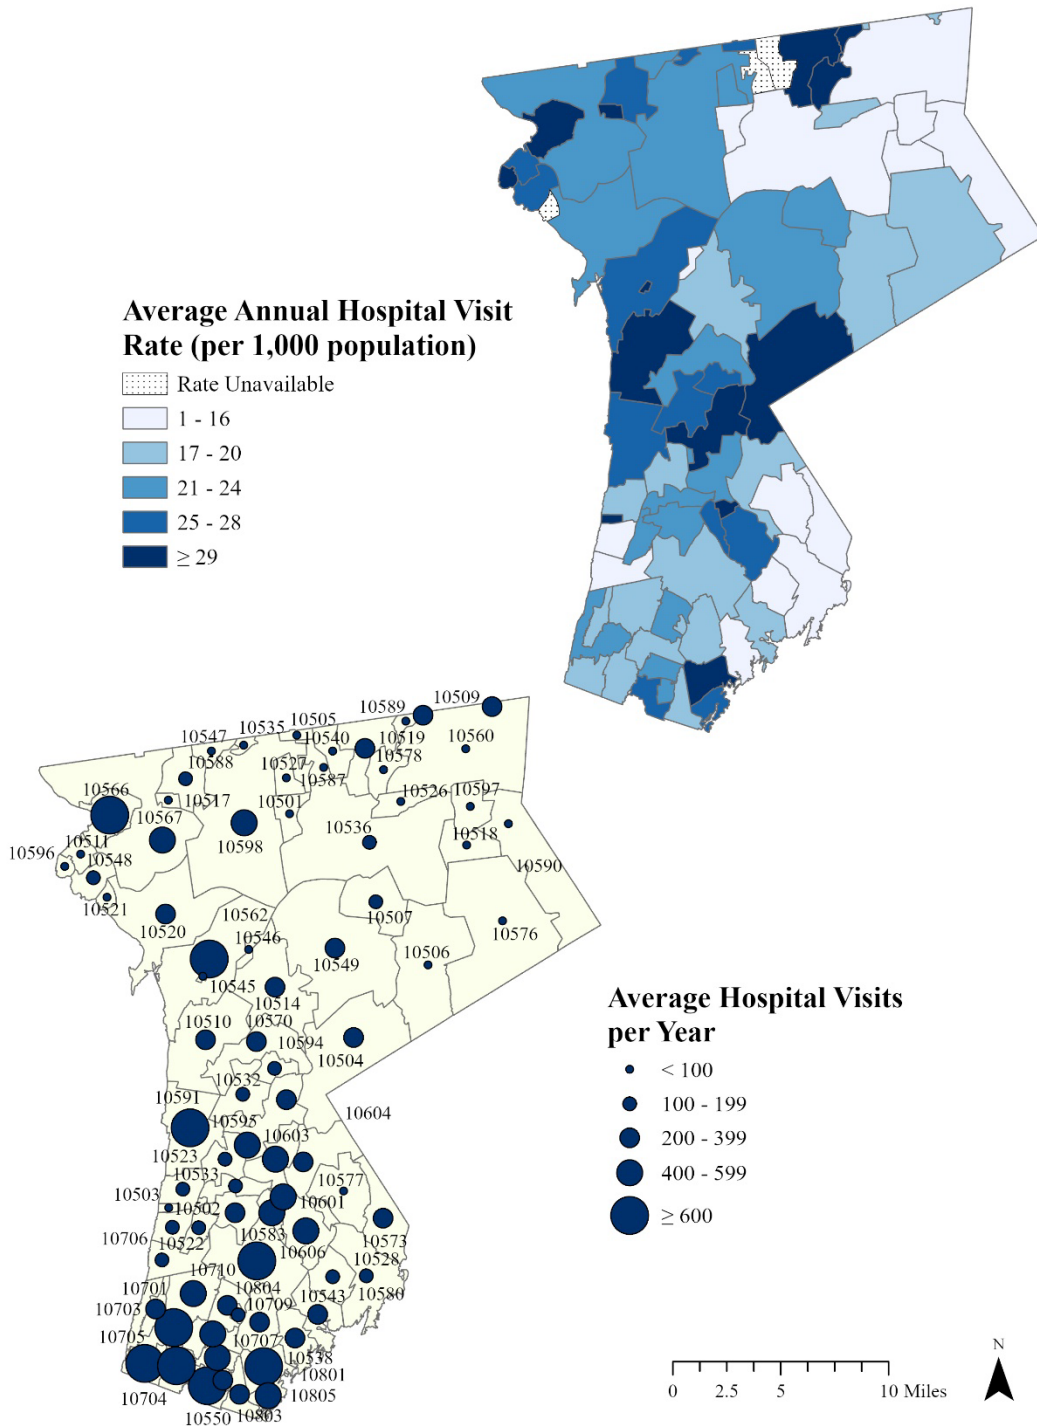

¹Claims with ethnicity reported as Unknown are not included in these visuals.

White patients comprised more than half of all hospital visits involving a fall, observing an eight percent higher average visit rate than that of Black patients, 78% higher rate than that of Hispanic patients, and over three times the rate of Asian patients.

Patient Demographics

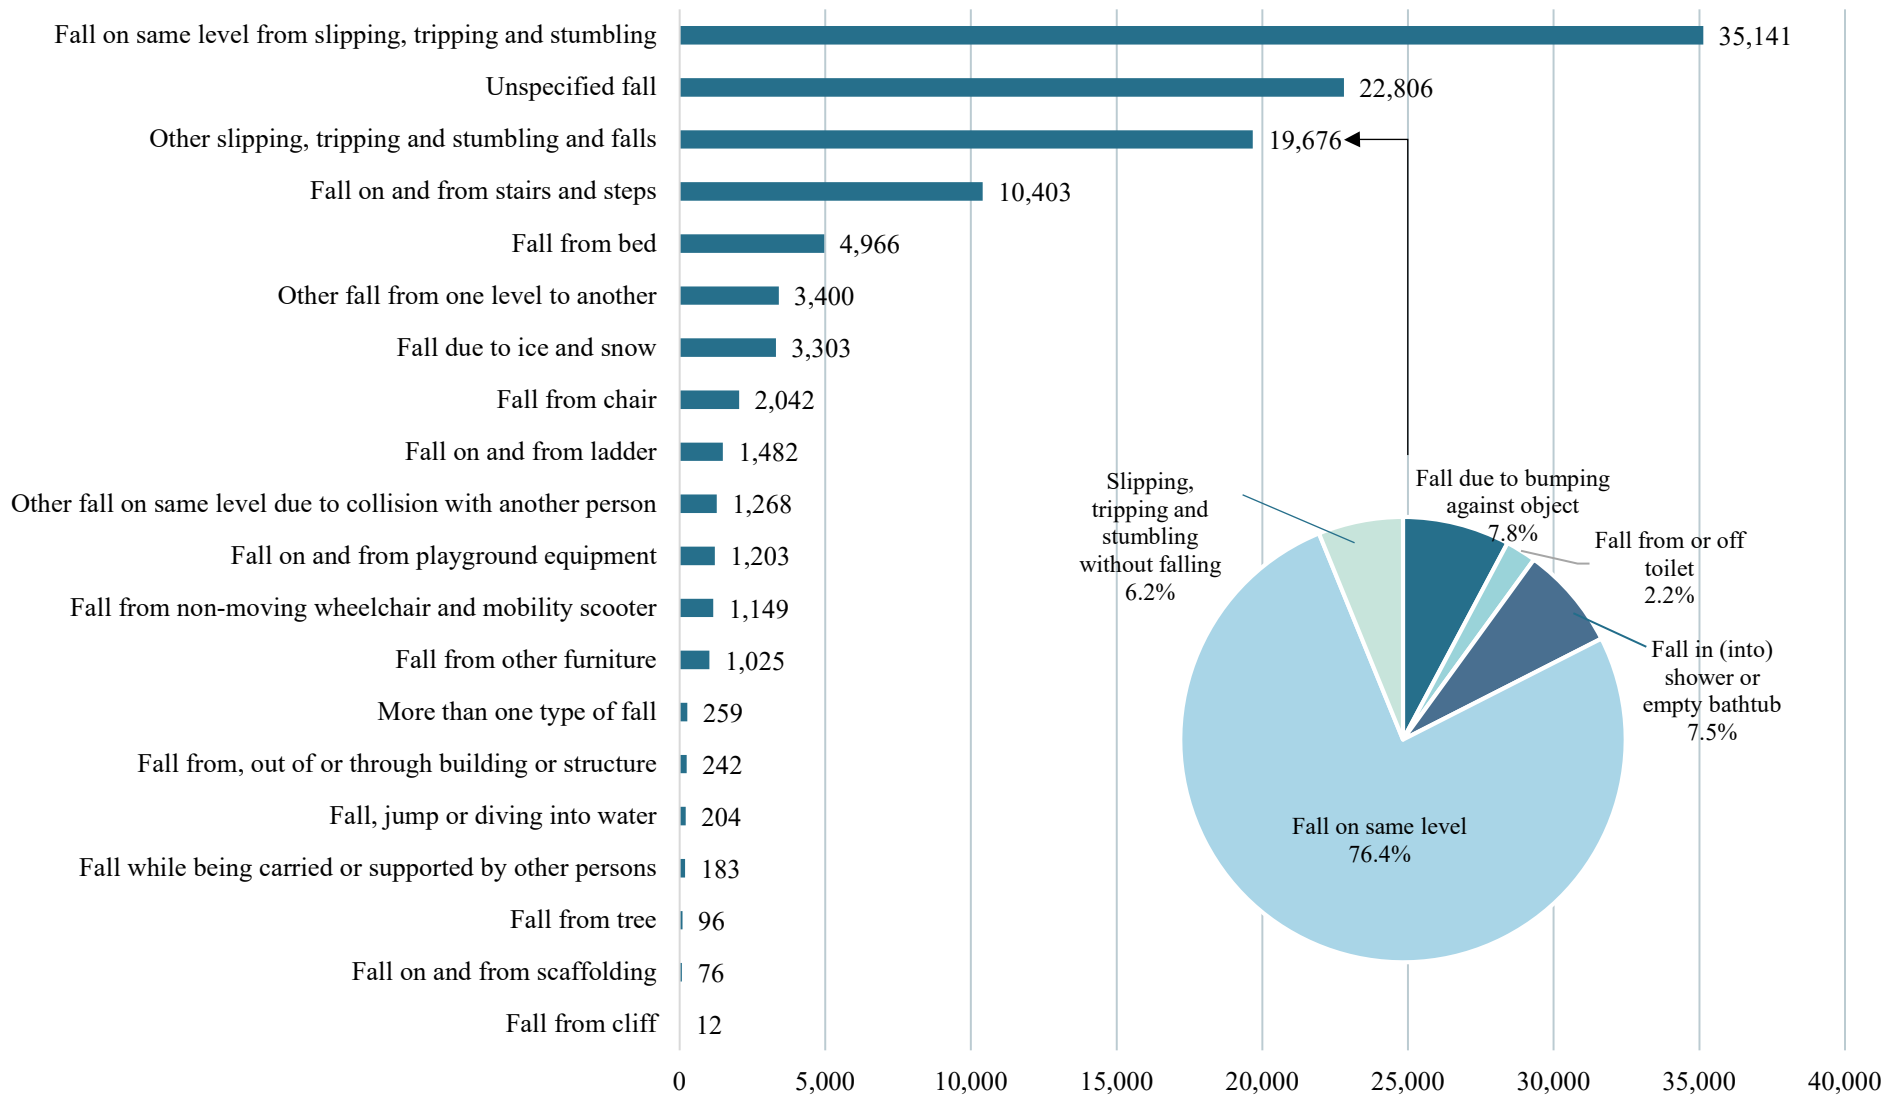

Hospital visits involving falls and rate per 100,000 population by ZIP code, Westchester County, 2019 - 2023

On average, most hospital visits involving a fall from 2019 to 2023 were for people residing in the southern and central regions of Westchester County. When accounting for population density, areas with high average annual hospital visit rates are distributed more evenly throughout the county.

Type of Falls

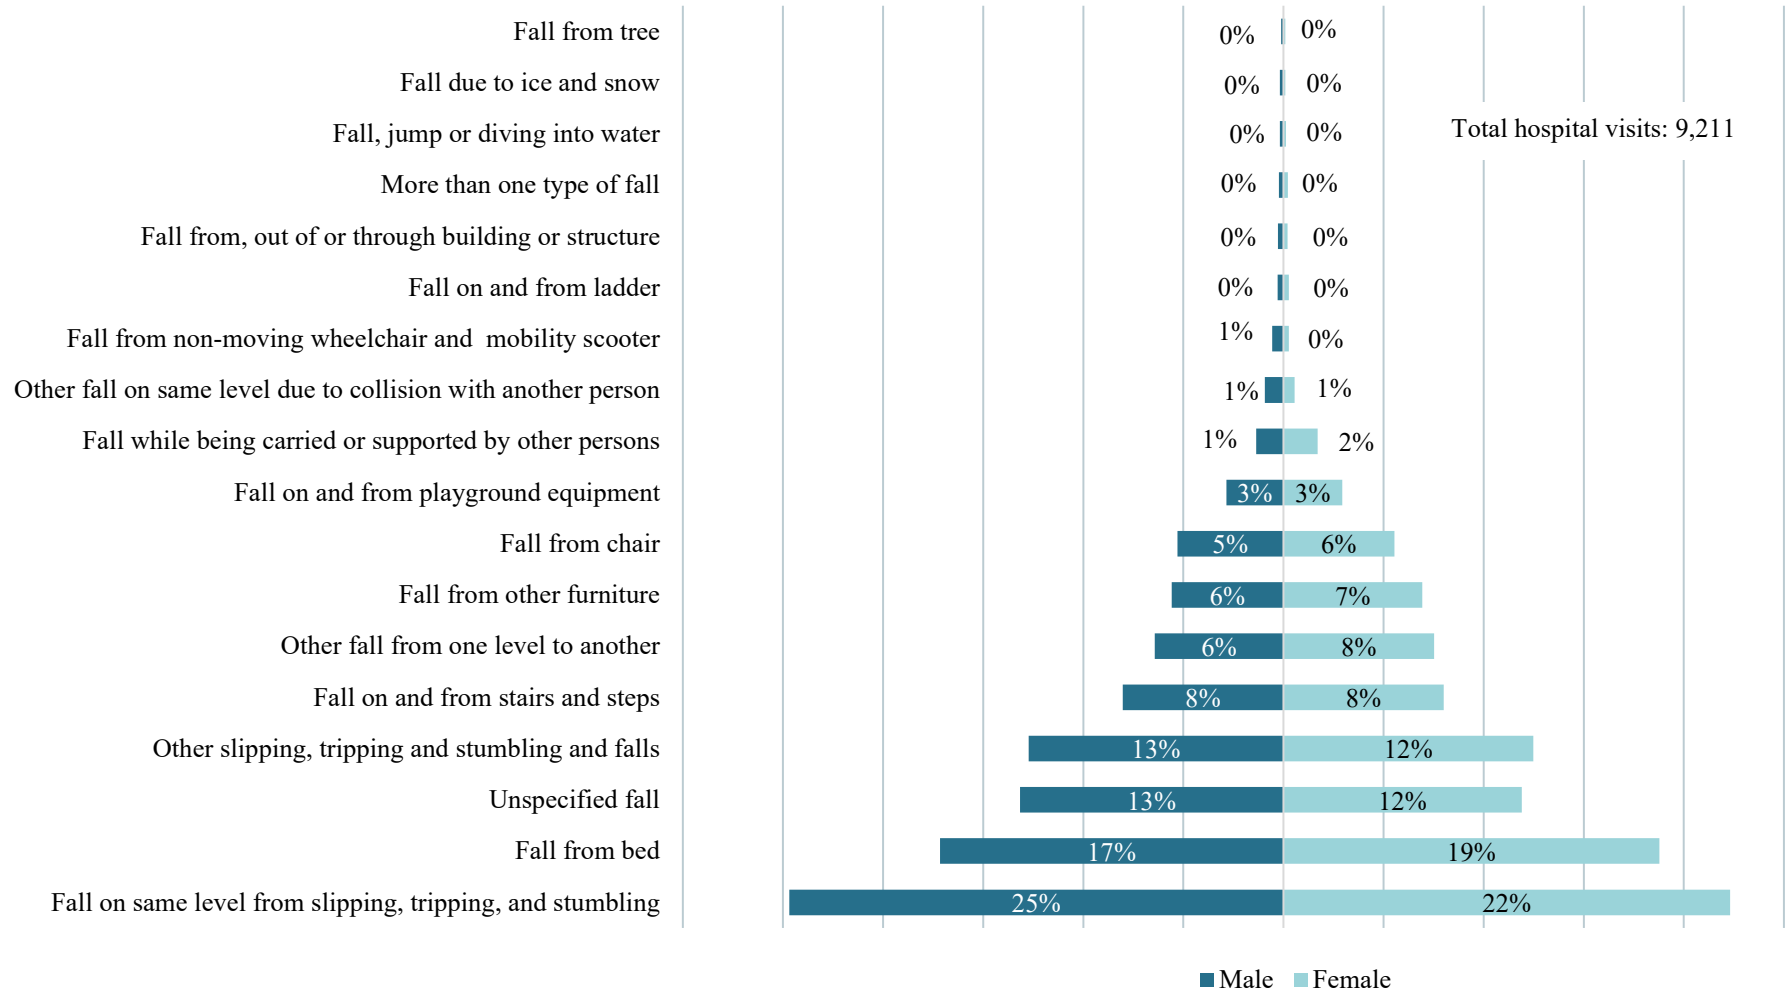

Hospital visits involving falls by fall type,¹ Westchester County, 2019 - 2023

¹See Appendix A for ICD-10 codes corresponding to each fall type.

Type of Falls by Age Group and Sex

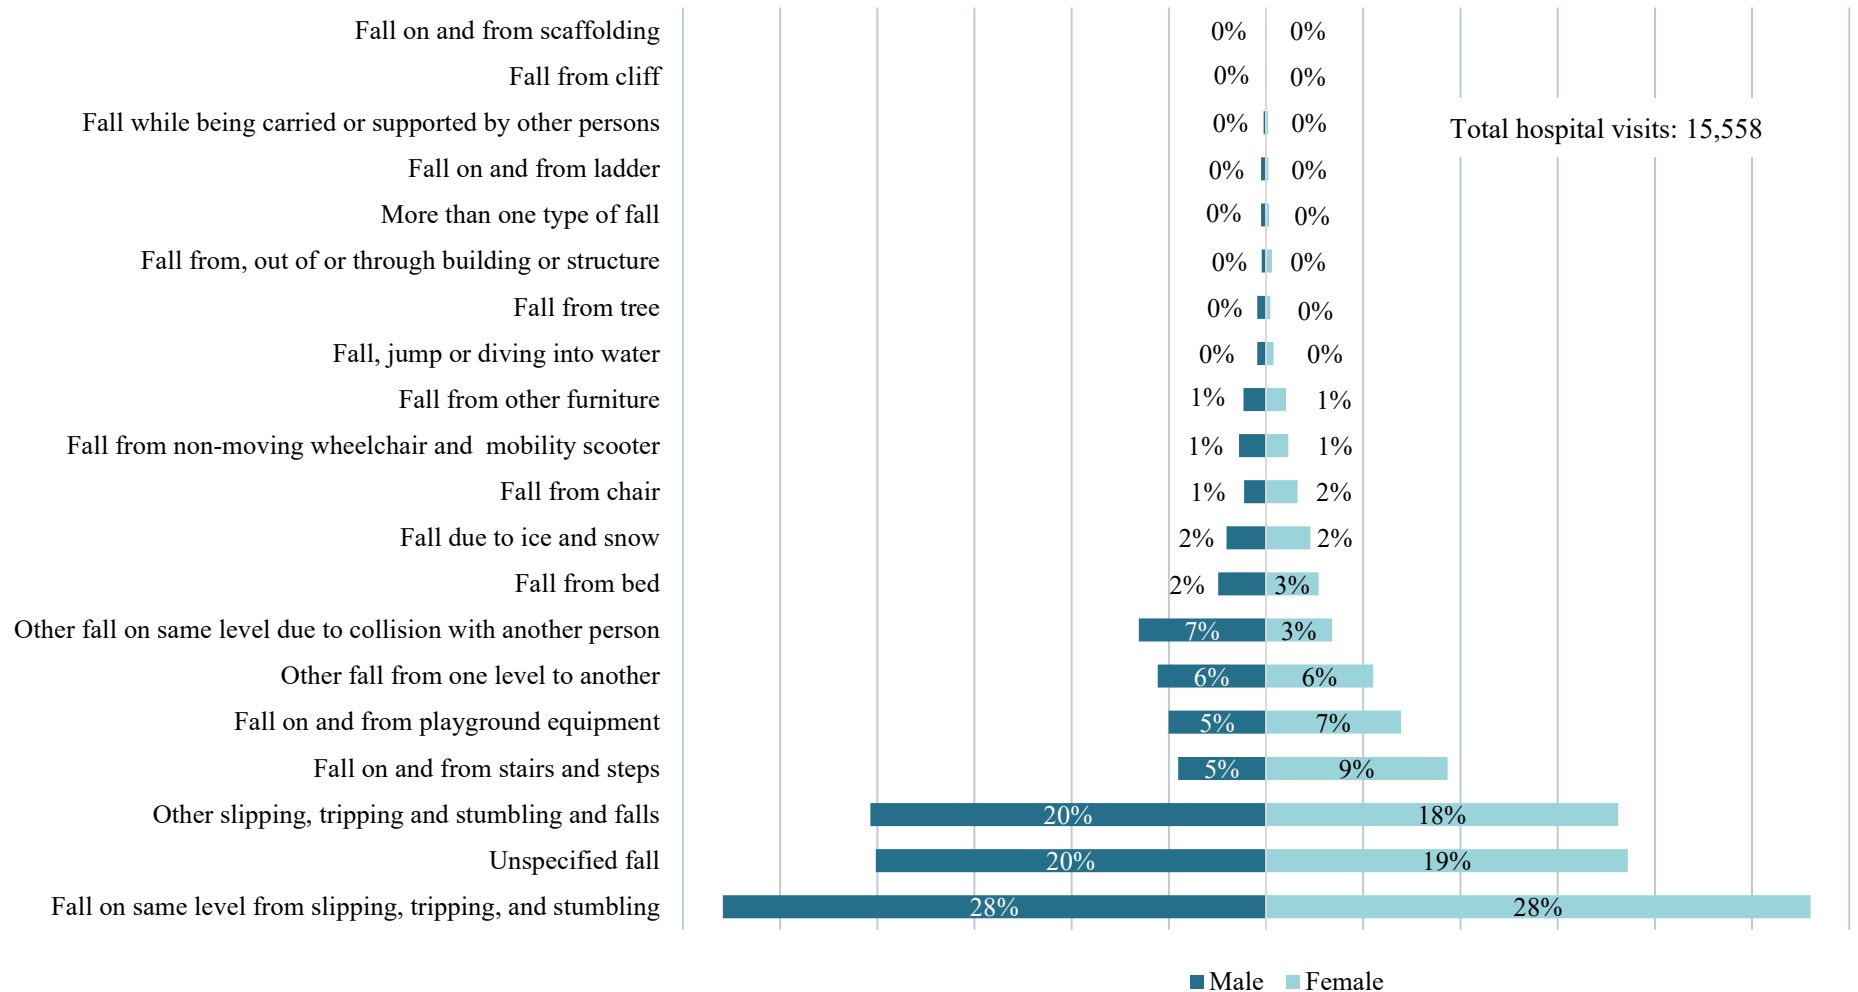

Hospital visits involving falls by fall type¹ among children under 5 years, Westchester County, 2019 - 2023

¹See Appendix A for ICD-10 codes corresponding to each fall type.

Type of Falls by Age Group and Sex

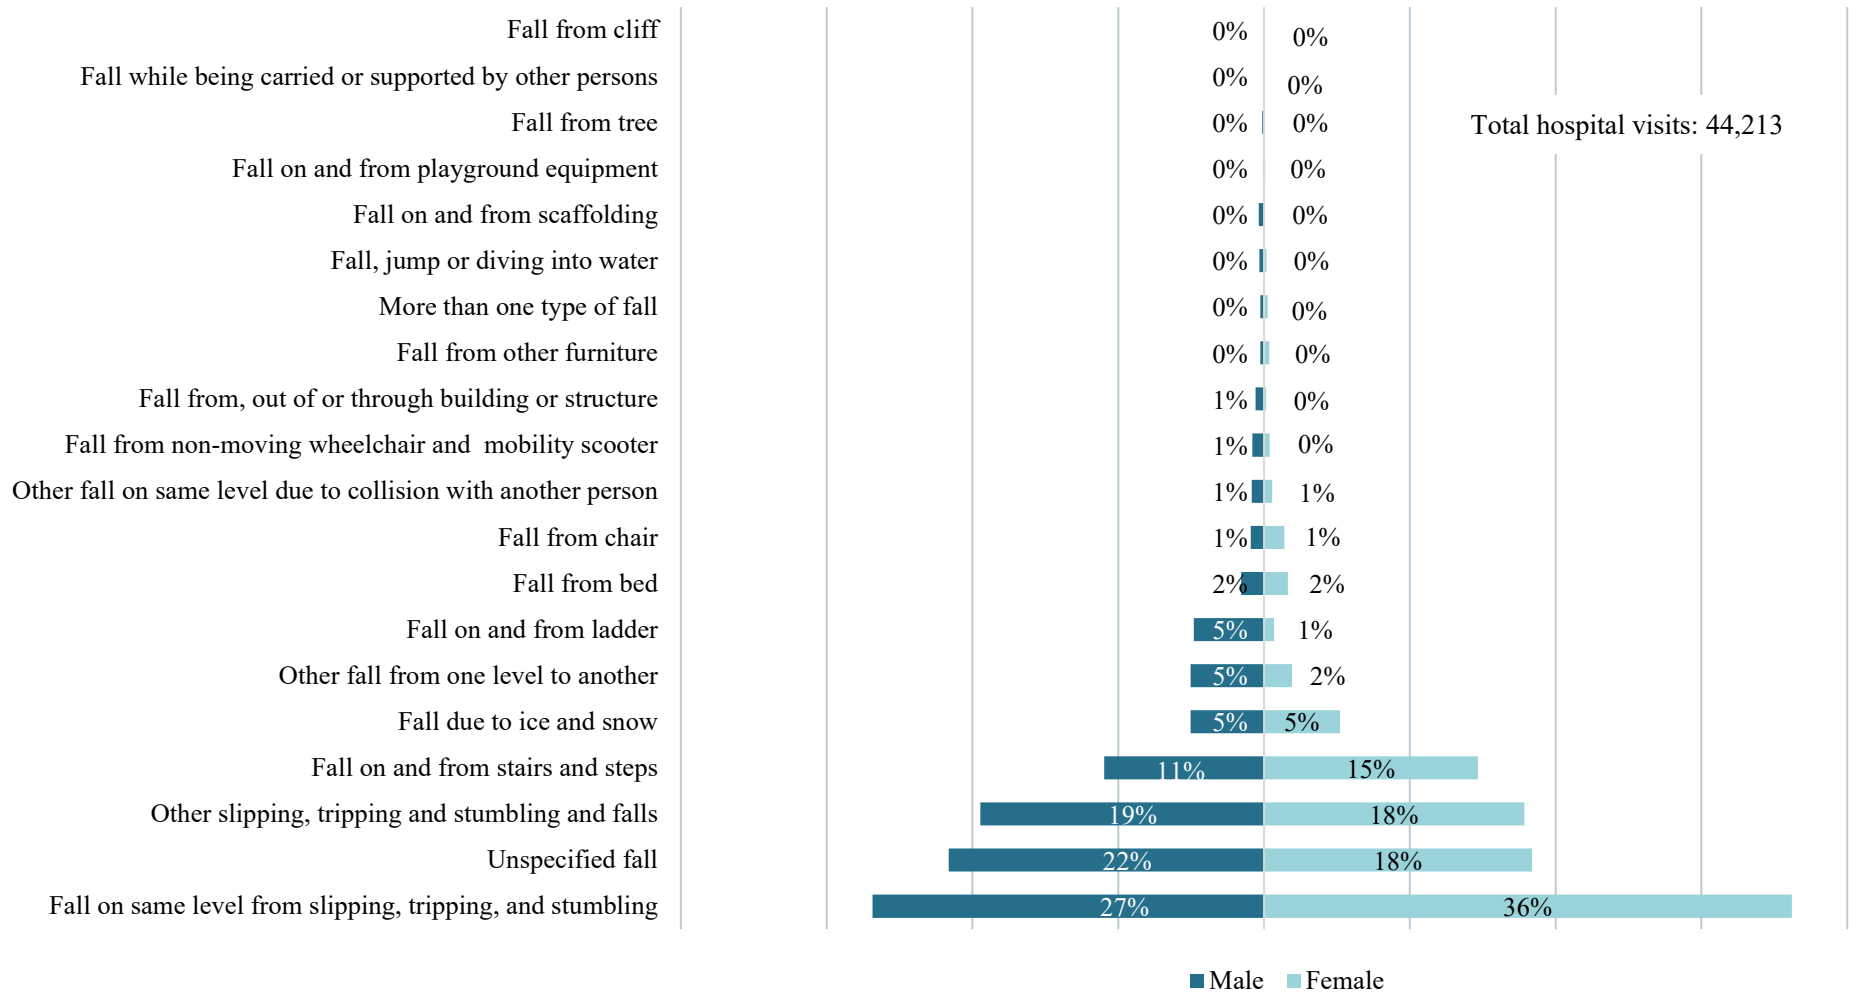

Hospital visits involving falls by fall type¹ among children ages 5 to 17 years, Westchester County, 2019 - 2023

¹See Appendix A for ICD-10 codes corresponding to each fall type.

Type of Falls by Age Group and Sex

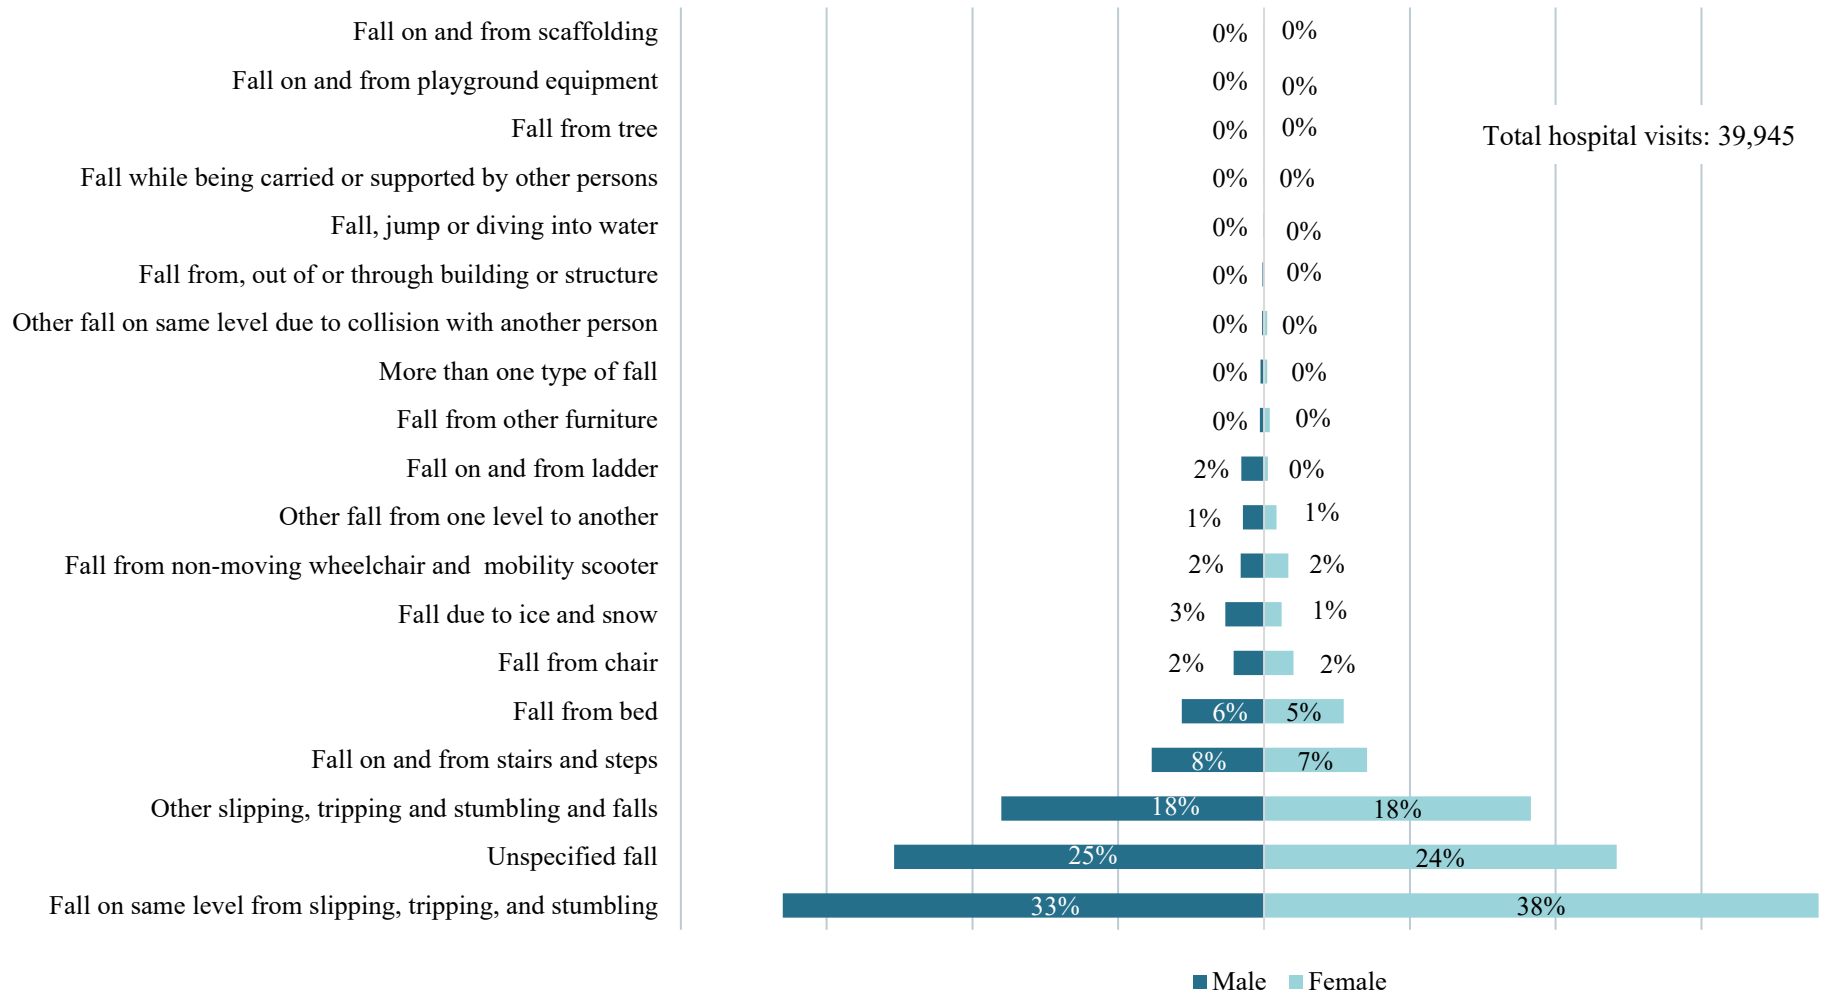

Hospital visits involving falls by fall type¹ among adults ages 18 to 64 years, Westchester County, 2019 - 2023

¹See Appendix A for ICD-10 codes corresponding to each fall type.

Type of Falls by Age Group and Sex

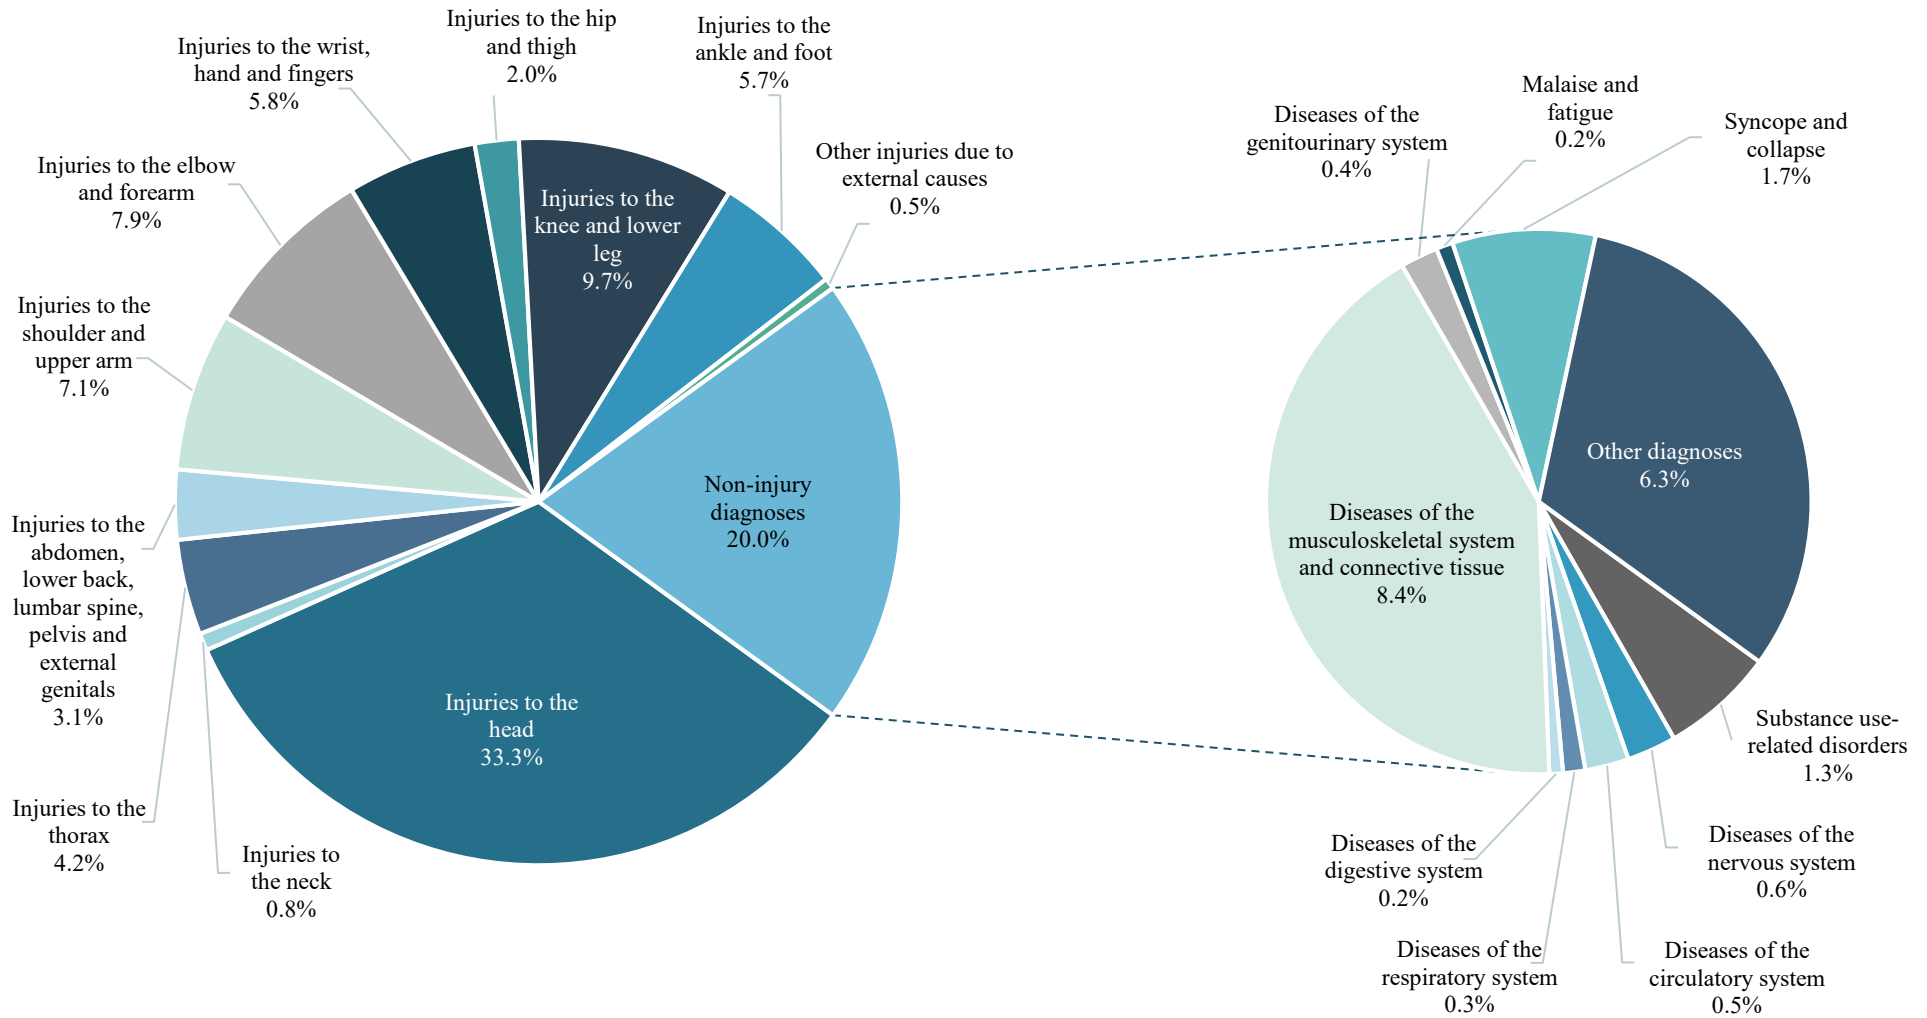

Hospital visits involving falls by fall type¹ among adults ages 65 years and up, Westchester County, 2019 - 2023

¹See Appendix A for ICD-10 codes corresponding to each fall type.

Principal Diagnoses

Hospital visits involving falls by principal diagnosis,^{1,2}
Westchester County, 2019 - 2023

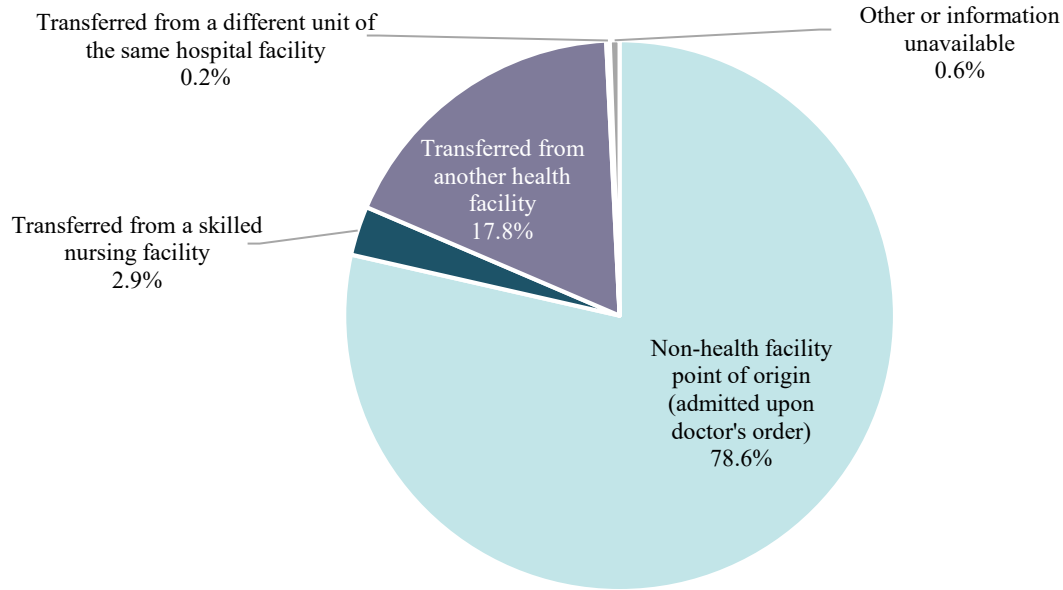

¹The principal diagnosis is the condition chiefly responsible for the hospital visit.

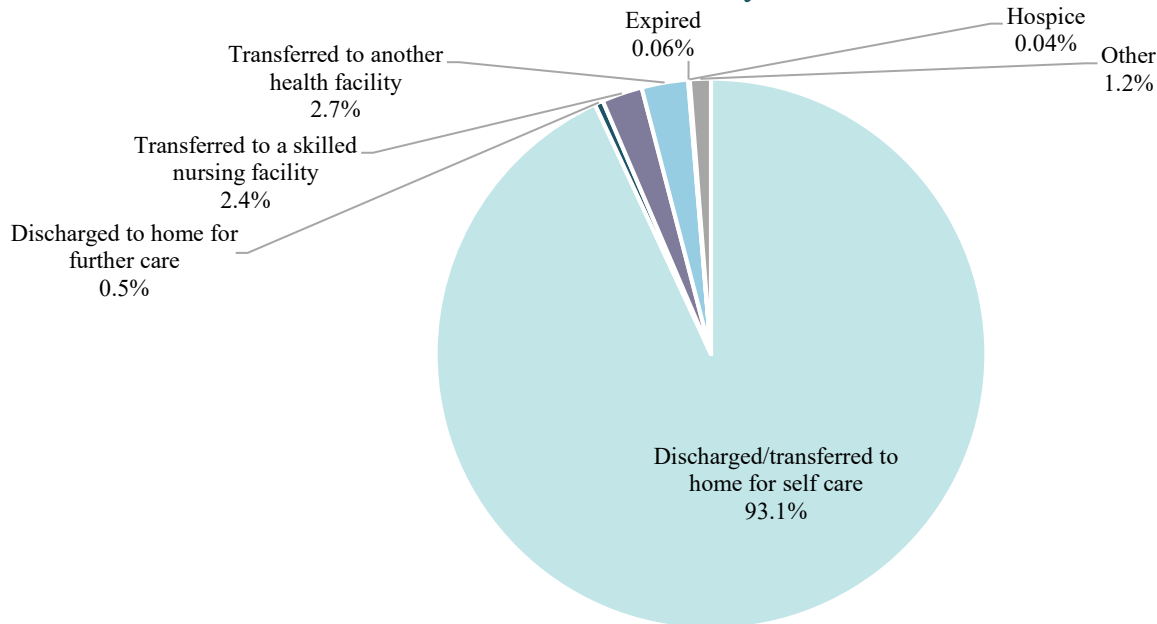

²See Appendix A for ICD-10 codes corresponding to each principal diagnosis.

Admission and Discharge Status

Hospital visits involving falls by patient admission source, Westchester County, 2019 - 2023

Hospital visits involving falls by patient discharge status, Westchester County, 2019 - 2023

Almost 80% of hospital visits were ordered by the patient's doctor. Upon discharge, less than six percent of patients were transferred to other health facilities to receive further care.

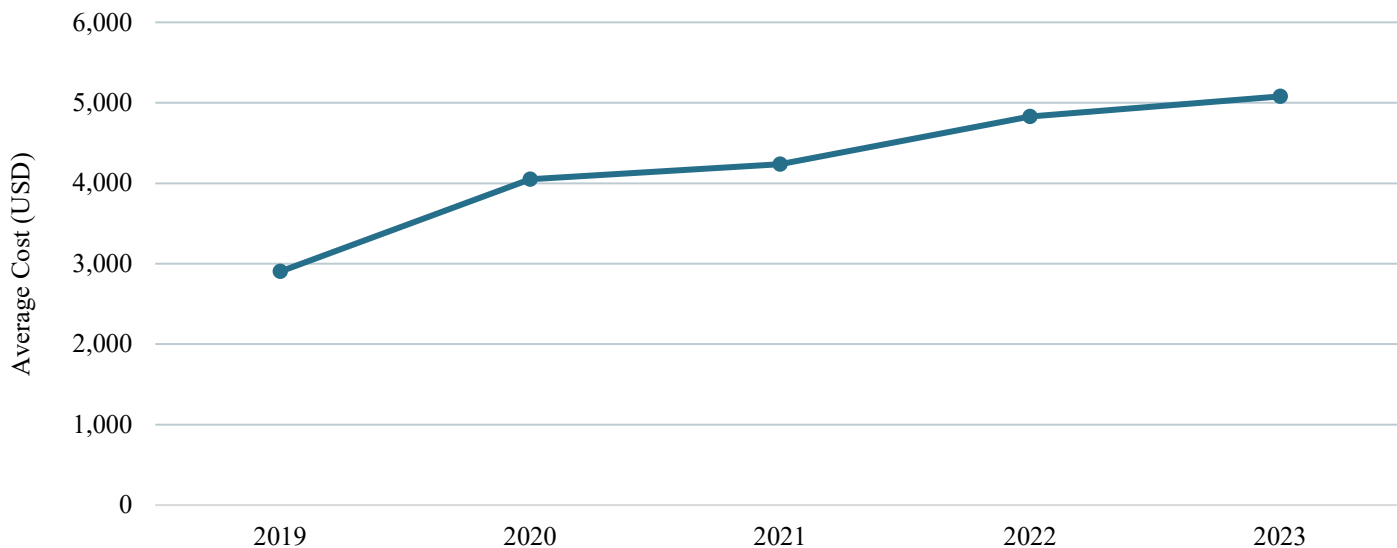

Hospital of Care

Hospital visits involving falls by hospital of care, Westchester County, 2019 – 2023

Hospital of Care	2019	2020	2021	2022	2023	Total

Claim Cost

Average cost per hospital visit involving a fall,
Westchester County, 2019 - 2023

The average cost per hospital visit claim involving a fall was over \$4,200, observing approximately a 16% average annual increase in cost from 2019 to 2023.

Data Sources

This Community Health Data Report was prepared using the New York State Department of Health’s Statewide Planning and Research Cooperative System (SPARCS). SPARCS collects information pertaining to discharges across all hospitals in New York State. This includes each hospital inpatient stay and hospital outpatient visit. This report references only hospital outpatient visits for residents of Westchester County from 2019 to 2023. Hospital visits include emergency department visits, ambulatory surgeries, and other outpatient services.

SPARCS data are collected at the patient-level, reporting the demographics, diagnoses, services provided, and hospital charges for each patient. In order to protect patient privacy, de-identified data was used to create this report, meaning all personal identifiers (i.e., patient names, residential addresses, and individual medical records) have been omitted from the county’s data set.

Additionally, reporting of data by individual hospitals to the New York State Department of Health varies in completeness over time. As a result, SPARCS data are routinely being updated. All data in this report reflect SPARCS in relation to Westchester County as of November 2024, when this data were received.

Maps

The distribution of hospital visits involving falls by residential ZIP code are reported by both case count and case rate. To determine rates for these maps, as well as other data visuals throughout this report, population data were retrieved from the U.S. Census Bureau’s 2020 decennial census (Appendix B).

Rates could not be calculated due to complications in population reporting for three ZIP codes – 10521, 10540 and 10587. In order to maintain consistency in data reporting, hospital visits made by patients residing in these three ZIP codes are grouped into the nearest and/or largest neighboring ZIP codes.

Diagnoses

SPARCS uses the tenth revision of the International Classification of Diseases (ICD-10) to log diagnoses made during each hospital visit. Hospital visits involving falls were determined for this report by a search of the ICD-10 codes listed for each claim. The principal diagnosis is the condition of the patient chiefly responsible for their hospital visit. This report includes all hospital visit claims with any diagnosis involving a fall. Codes of interest are listed in Appendix A.

Appendix

Appendix A. ICD-10 codes for hospital visits involving falls

Category	ICD-10 Code	Description
Circumstances of the hospitalization (slipping, tripping, stumbling and falls)	W00	Fall due to ice and snow
	W01	Fall on same level from slipping, tripping and stumbling
	W03	Other fall on same level due to collision with another person
	W04	Fall while being carried or supported by other persons
	W05	Fall from non-moving wheelchair, nonmotorized scooter and motorized mobility scooter
	W06	Fall from bed
	W07	Fall from chair
	W08	Fall from other furniture
	W09	Fall on and from playground equipment
	W10	Fall on and from stairs and steps
	W11	Fall on and from ladder
	W12	Fall on and from scaffolding
	W13	Fall from, out of or through building or structure
	W14	Fall from tree
	W15	Fall from cliff
	W16	Fall, jump or diving into water
	W17	Other fall from one level to another
	W18	Other slipping, tripping and stumbling and falls
	W19	Unspecified fall
Nature of the hospitalization (principal diagnosis)	S00-S09	Injuries to the head
	S10-S19	Injuries to the neck
	S20-S29	Injuries to the thorax
	S30-S39	Injuries to the abdomen, lower back, lumbar spine, pelvis and external genitals
	S40-S49	Injuries to the shoulder and upper arm
	S50-S59	Injuries to the elbow and forearm
	S60-S69	Injuries to the wrist, hand and fingers
	S70-S79	Injuries to the hip and thigh
	S80-S89	Injuries to the knee and lower leg
	S90-S99	Injuries to the ankle and foot
	T07-T88	Other injuries due to external causes
	F10-F19	Substance use-related disorders
	G00-G99	Diseases of the nervous system
	I00-I99	Diseases of the circulatory system
	J00-J99	Diseases of the respiratory system
	K00-K95	Diseases of the digestive system
	M00-M99	Diseases of the musculoskeletal system and connective tissue
	N00-N99	Diseases of the genitourinary system
	R53	Malaise and fatigue
	R55	Syncope and collapse
	Other diagnoses
